Denver, Colorado 80203

INTRODUCTION

This document is our second annual effort to provide Colorado public library administrators with the statistics and input-output measures which they may find useful in planning, budgeting, and doing public relations for their libraries.

The good news is that this 1985 data is much more valid and reliable than the 1984 data reported last year. We are also pleased to report that Colorado is participating in the pilot project for the ALA Public Library Data Service which will make comparable 1986 statistical data available from about two dozen other states.

The bad news is that, despite the good news, these statistics and the input-output measures generated from them are still limited. These limitations are identified at relevant points in this document. The most important general comment we might make is that one should not make too much of small differences between libraries (for example, the "difference" between .45 and .47 on Registration Per Capita). Alas, the data simply are not that precise (and we do not want you to be accused of "slicing bologna with a laser").

As always, we are interested in hearing from you about your assessment of this document and the reported figures. If you spot an error, please let us know. Likewise, we would appreciate some feedback from you about how useful you find the statistics and input-output measures. (We received some reports that these data were instrumental in doubling and tripling all or part of some library budgets!)

If you need further assistance in making use of this data, please call your System office or either of us:

PP	Plains & Peaks RLSS
RLD	Regional Library District
RLSS	Regional Library Service System
Svc Pop	Service Population
SW	Southwest RLSS
TR	Three Rivers RLSS

HOW TO LOCATE STATISTICS AND INPUT-OUTPUT MEASURES FOR YOUR PUBLIC LIBRARY AND OTHERS

This publication lists statistics and input-output measures for 1985 by the legal service population of the library or library district. At the end of each service population range, total and average statistics and average input-output measures are provided. Separately, before any of the service population ranges, total and average statistics and average input-output measures are provided for each Regional Library Service System and the state.

To locate the statistics and input-output measures for your public library and others, consult the lists at the end of this publication.

RESPONDING LIBRARIES IN ALPHABETICAL ORDER lists each library or library district by its name in alphabetical order and indicates its Regional Library Service System, county, and legal service population. To locate figures for your library or any other particular library by name, consult this list for the population figure and turn to the section on that service population. Reporting libraries or library districts are listed in ascending order by population.

RESPONDING LIBRARIES BY SYSTEM AND COUNTY may be consulted, if statistics or input-output measures for libraries or library districts in a particular system or county are needed, but their individual names are not known. Again, consult this list for their legal service populations and turn to the appropriate service population range(s).

If other types of comparisons need to be made (e.g., libraries with similarly sized staff, collections, operating budgets), please call the State Library (names and phone numbers listed in the INTRODUCTION). All of this data--and more--is accessible by microcomputer and can be manipulated to meet most data requests fairly easily.

PLANNING, BUDGETING, AND PUBLIC RELATIONS WITH INPUT-OUTPUT MEASURES FOR PUBLIC LIBRARIES:

A CASE STUDY

This essay reports input-output measures for Our Town Public Library and all public libraries serving comparable populations. A comparison of these figures has some noteworthy implications for planning, budgeting, and public relations by Our Town Public Library.

At least two general conclusions may be drawn from these two sets of input-output measures:

> On most input-output measures, Our Town Public Library compares poorly with all public libraries serving comparable populations.
>
> Lower service outputs generally follow from lower resource inputs. (Or, as the maxim goes, "you get what you pay for.")

OUTPUT MEASURES, 1985

While Our Town Public Library had the same registration per capita as the average library serving its size service population (.57), its other outputs were substantially poorer than those for the average library that size:

Output Measures, 1985	Our Town Public Library	Libraries Serving Like Service Pop.
Library Attendance Per Capita	1.1	3.2
In-Library Use Per Capita	0.1	1.4
Reference Per Capita	.03	0.3
Circulation Per Capita	0.6	6.0
Turnover Rate (Circ./Hldgs.)	.19	2.12
ILL Per 1,000 Circulation	37	12
Program Attendance Per Capita	.06	.18

During 1985, residents of Our Town Public Library made fewer visits to the library, used fewer materials in the library, circulated fewer materials, circulated a smaller percentage of the library's holdings, and attended fewer library programs.

In addition, more of the materials wanted by Our Town library users were borrowed from other libraries. Alone, a higher number of ILLs per 1,000 Circulation might be interpreted as an indicator that a library is doing a better job of resource sharing. In this case, however, correspondingly lower In-Library Use and Circulation Per Capita and Turnover Rate suggest that materials in the collection did not meet user needs.

INPUT MEASURES, 1985

To determine why Our Town residents receive so much less library service than residents of similarly sized communities, it may be useful to examine input measures for Our Town Public Library and its counterparts:

Input Measures, 1985	Our Town Public Library	Libraries Serving Like Service Pop.
Service Population Per Staff	5,444	2,667
Holdings Per Capita	3.1	2.9
Acquisition Rate	.05	.07
Staff Expenditures Per Capita	$1.80	$5.50
Materials Expenditures Per Capita	$1.06	$1.70
Miscellaneous Expenditures Per Capita	$0.81	$2.18
Total Operating Expenditures Per Capita	$3.67	$9.38

Clearly, in 1985, Our Town Public Library was substantially more hard pressed for resources than its counterparts serving similarly sized populations. The size of Our Town library staff relative to that of comparable libraries appears to be quite inadequate. Our Town spent only about one-third as much on staff, so each of its staff served more than twice as many residents. Notably, there is no evidence that Our Town's lower use of materials is attributable to the size or growth rate of its collection. The amount spent by Our Town on new materials, however, is significantly lower than the figure for comparable libraries. An even more obvious comparison is the fact that Our Town spent less than half as much on miscellaneous operating expenditures as its counterparts. This category may include any of the costs of maintaining and operating library facilities--including utilities, telephone and other telecommunications, furniture and equipment.

As large a discrepancy as this one may be explained in either of two ways. Miscellaneous operating expenditures may average higher for comparable libraries than Our Town, because of the number of branches involved. Our Town Public Library might have no branches, but libraries serving similarly sized populations might have an average of one branch (in addition to their main facilities). That, however, was not the case in this example. In fact, in-kind contributions from Our Town relieved the library from having to cover many of these costs in its budget. In-kind contributions toward miscellaneous operating expenses might include space for the library in the city hall and payment of utility and telephone/telecommunications bills by Our Town.

This in-kind factor explains a sizeable proportion of the discrepancy in Total Operating Expenditures Per Capita. In the case of Our Town, however, it does not explain lower staff and materials expenditures and the lower outputs of library service for which they appear to be responsible.

CONCLUSIONS

Strategies for increasing the services of Our Town Public Library might include:

- developing a library budget request which includes increases in per capita funding for staff and materials to at least the average for its service population range and which includes figures reflecting the value of Our Town's in-kind contributions toward the library's miscellaneous operating expenses.
- promoting registration of borrowers as well as circulating and in-library use of the collection through a more aggressive public relations campaign,
- providing reference services to direct users to library materials which they may not be finding on their own,
- writing and implementing a collection development plan which establishes clear guidelines for building a collection that is more useful to the population served, and
- designing and offering public programs on topics and at times identified as desirable by users in the needs assessment.

Having read how an analysis of input-output measures might be useful to the anonymous "Our Town Public Library", take a few minutes to complete the following form by inserting the figures for each measure for your library and for all libraries serving comparably sized populations. Share the completed form with your library staff and/or board and decide if the results have any implications for planning, budgeting, or public relations for your library. If you need any assistance making use of the figures, please call your System office or the State Library (names and telephone numbers listed in the FOREWORD).

DEFINITIONS AND NOTES FOR SELECTED STATISTICS

Following is a list of selected statistics from the 1985 Public Library Annual Report with definitions and notes. The numbers are item numbers in that survey.

1. Legal Svc Area Pop

For legal service areas designated by responding libraries, populations were determined using the Division of Local Government's July 1985 population estimates. (This is the authoritative source of comparable statewide population figures between U.S. Censuses.)

3. Updated Registration

Responding libraries which indicated that their registration files had been updated within the last three years are coded "1". Where that is not the case, the code is "0". This is a criterion for the inclusion of registration figures in the ALA cooperative public library data system.

4. Individual Borrowers

This number indicates the number of library users who have applied for & received identification numbers or cards which establish the conditions for borrowing materials.

5. Family Borrowers

This number indicates the number of families or households to whom a single identification number or card has been issued. This figure is translated into individual borrowers by multiplying it by 2.59, the Division of Local Government's estimate of the average number of persons per household for Colorado in 1985.

6. Only or Central Lib

Responding libraries which indicated the existence of an only or central library were coded "1". Those which did not (local systems or districts whose constituent libraries are equal members) were coded "0".

7. Branches/Libs in District

This item indicates the number of constituent libraries in a local system or district (excluding the responding library, if it is identified in item 6). Due to this item, beware of the possibility that item 10 may include some duplicated counts of library district members.

8. Bookmobiles

This number indicates the number of bookmobile units operated by the responding library, NOT the number of bookmobile stops.

11. MLS FTEs

This number indicates the number of librarians with graduate degrees from ALA-accredited library/information science programs in full-time equivalents. (Forty hours per week is assumed to be full-time in all cases, regardless of the number of hours the responding library is open.)

14. Total FTEs

This figure represents all library staff except those responsible for the operation & maintenance of the facility (e.g., building manager, custodian).

15. Local Sources

This figure includes all funds allocated by the local government (municipality, county, &/or library district).

20. State Sources

This figure includes all funds allocated by the state government except federal funds which are merely distributed by the state (Example: revenue sharing).

24. Revenue Sharing
25. LSCA
26. Other Federal

Items 24-26 indicate amounts of different types of funds received from the federal government.

28. Library Generated

This amount includes all income generated by library activities.

35. Gifts/Donations

This amount includes all gifts & donations of money from all sources, but excludes in-kind contributions of materials & equipment.

36. Other Income

This amount includes all income not reported in items 15-35. (Example: private grants.)

37. Total Income

This figure is the sum of items 15, 20, 27, 28, 35, & 36.

44. Staff Expenditures

This figure includes salaries/wages and employee benefits of all staff except facility operation & maintenance staff.

52. Materials Expenditures

This figure includes expenditures on all materials regardless of format.

56. Miscellaneous Expenditures

This includes costs of maintenance and operation, furniture and equipment, and other operating expenditures.

57. Total Operating Expenditures

This figure is the sum of items 44, 52, & 56.

58. Capital Outlay

This amount includes all funds used to acquire or add to building sites, new buildings & building additions, new equipment, furnishing, vehicles, etc.

59. Total Expenditures

This figure is the sum of items 57 & 58.

66. Postage
67. Telephone & Telecomm.

Items 66 and 67 identify expenditures which may appear in different places in different library budgets. These items were requested specifically by the American Library Association as part of the cooperative public library data service. Data such as these are essential to ALA's federal legislative efforts to contain such operating costs for libraries.

71. Book & Periodical Titles Added
73. Book & Periodical Titles Held
74. Uncataloged Materials Titles Added
76. Uncataloged Materials Titles Held
77. Government Publications Titles Added
79. Government Publications Titles Held
80. Microform Titles Added
81. Microform Titles Held
82. Audio Titles Added
84. Audio Titles Held
85. Film Titles Added
87. Film Titles Held
88. Video Titles Added
90. Video Titles Held
91. Software Titles Added
93. Software Titles Held
94. Other Materials Titles Added
96. Other Materials Titles Held

97. Total Added

This figure is the sum of items 71, 74, 77, 80, 82, 85, 88, 91, & 94.

98. Total Holdings

This figure is the sum of items 73, 76, 79, 81, 84, 87, 90, 93, & 96.

100. Subscriptions

Item 100 indicates the number of periodical & newspaper titles to which the library subscribes currently.

101. Hours Open Per Week

This item indicates the number of hours a library is open to the public during a typical week. For libraries with more than one facility (e.g., local or county systems, library districts) overlapping hours are NOT counted.

102. Attendance Per Week

This figure indicates the number of persons entering the library per typical week, including those attending activities, meetings, and those requiring no services.

103. In-Library Use Per Week

This figure indicates the number of materials used in the library, but NOT checked out.

104. Reference Per Week

This figure indicates the number of information contacts in which a staff member involves in any way information sources of any type. It does not include directional transactions (e.g., "Where is Lucy/Larry Librarian?" or--of course--"Where is the restroom?")

105. Annual Hours Open

This figure is comparable to item 101, except that it is annual & DOES include duplicate hours for local or county systems or library districts.

106. Annual Adult Circulation
107. Annual Juvenile Circulation

Items 106 & 107 separate adult & juvenile circulation.

108. Total Annual Circulation

This figure is the sum of items 106 & 107.

109. Public Programs
110. Program Attendance

Items 109 & 110 deal with information service to groups. Public programs/presentations include information services provided to groups and planned in advance. Presentations both on & off library premises are included, as long as they are sponsored by the library. Such services do not include meetings sponsored by other groups using library meeting space.

113. ILL Provided
114. ILL Received

Items 113 & 114 indicate the numbers of interlibrary loans provided to other libraries & received from them, respectively.

ASSUMPTIONS UNDERLYING PER CAPITA MEASURES

The input-output measures described and reported in this document include five inputs reported on a per capita basis:

staff expenditures,
materials expenditures,
miscellaneous expenditures,
total operating expenditures, and
holdings.

Six outputs are reported on a per capita basis:

registration,
library attendance,
in-library use,
reference,
circulation, and
program attendance.

Three assumptions underlie all of these per capita measures:

1. All library users reside within the library's legal service area.
2. All residents of the library's legal service area are library users.
3. All residents of the library's legal service area make equal contributions to and equal demands on library services.

In fact, none of these assumptions is true. Most likely, every public library has some users who reside outside its legal service area.

The second assumption is equally false. In every legal service area's population, some persons are counted who have little, if any, use for the public library (for example, infants, the institutionalized, geographically isolated residents).

It is equally certain that the third assumption is not true. Because library service is usually funded through property or sales taxes, residents' contributions to it must vary markedly. Likewise, use made of the library varies with the wide range of information needs of area residents.

Why then, might measures based on such patently false assumptions be useful? Quite simply, because making these assumptions is essential to developing a picture of how much the average resident puts into and gets out of the public library. There being no other way to control for their varying contributions to and uses of the library, we must be willing to ignore them, to average them out. We must be willing to believe that, though false, these assumptions are no more false for one library than another. Or, at least, that this is no more the case than we are willing to tolerate.

The assumptions of which we are most intolerant suggest the directions in which we need to move in order to refine these statistics further. The assumption that all users reside within the library's legal service area may be such a measure. In that belief, the "other service population" item was added to the 1985 report. Alas, however, figures reported in that item were developed in such different ways that it was impossible to use that data to control for non-resident use of public libraries. So, those non-comparable figures are not reported here. Until next year, at least, we are stuck with the first assumption!

OUTPUT MEASURES

REGISTRATION PER CAPITA

Registration Per Capita relates the number of persons registered as borrowers to the number of persons the library is established to serve. It is the number of registrations *divided by* the library's legal service area population.

The number of registered borrowers is the number of *individual* registrations *plus* the number of *family/household* registrations *multiplied by* 2.59, the average number of persons per household in Colorado.

This measure indicates the percentage of the library's potential users who are actually authorized to borrow materials from the collection. If a small proportion of registered borrowers have not *actually* used the library, they have at least demonstrated an *intent* to use it.

NOTE: Although all registration figures reported by Colorado public libraries are included in this document, figures for libraries which have not updated their registration files in the past three years should be regarded as being of questionable validity.

This output measure may be relevant whenever public awareness of the library is called into question. Assuming a library's registration file is up-to-date, this figure indicates the percentage of potential users who--at the very least--know the library exists and have implied an intent to use it. High *Registration Per Capita* may also be useful in justifying increases in input measures (such as *Staff*, *Materials*, and/or *Miscellaneous Expenditures Per Capita*).

LIBRARY ATTENDANCE PER CAPITA

Library Attendance Per Capita relates the number of visits made to the library to the number of persons the library is established to serve. It is attendance at the library during a typical week *multiplied by* 50 (the average number of weeks a public library is open during a year) *divided by* the library's legal service area population.

Attendance per typical week may be estimated by counting the number of persons (excluding library staff, of course) who enter--or, if preferred, leave--the library during a typical week. A typical week is one during which the library is open its regular hours (no holidays) and which is neither extraordinarily busy nor slow.

Library Attendance Per Capita indicates the average number of library visits per person served.

It is a better measure of public awareness of the library than Registration Per Capita. While registration statistics on which the latter is based may be out-of-date and, therefore, questionably valid, attendance statistics on which the former is based reflect actual visits to the library. Taken with In-Library Use, Reference, Circulation, and Program Attendance Per Capita), Library Attendance Per Capita can be used to develop an annual profile of library use.

IN-LIBRARY USE PER CAPITA

In-Library Use Per Capita relates the number of materials used in the library (but not checked out) to the number of persons the library is established to serve. It is in-library use per typical week multiplied by 50 (the average number of weeks a public library is open during a year) divided by the library's legal service area population.

In-library use per typical week may be determined by counting the number of items to be reshelved or refiled during a typical week (that is, one during which the library is open its regular hours--no holidays--& which is neither extraordinarily busy nor slow) or a week's worth of typical days (for example, Monday the first week, Tuesday the second week, and so on).

This measure indicates the average number of items used in the library (but not checked out) per resident of the library's legal service area.

This output measure may be relevant whenever evidence of library use is required. To the extent that people turn to the library as a source of useful information (rather than a repository of recreational reading), In-Library Use Per Capita is at least as important to consider as Circulation Per Capita.

REFERENCE PER CAPITA

Reference Per Capita relates the number of information contacts in which a staff member involves information sources to the number of persons the library is established to serve. It is the number of reference transactions per typical week multiplied by 50 (the average number of weeks a public library is open during a year) divided by the library's legal service area population.

This measure indicates the average number of times a resident of the library's legal service area received staff assistance in using information sources available at or accessible through the library.

Reference Per Capita may be relevant whenever the impact of reference service is an issue. Comparing this figure to Circulation and In-Library Use Per Capita may be useful in assessing the reference desk as an access point for information available in the local collection. Comparing it to ILLs Per 1,000 Circulation and ILL Net Lending Rate may be useful in assessing access via the reference desk to information that may not be available locally.

CIRCULATION PER CAPITA

Circulation Per Capita relates the number of loans of library materials to the number of persons the library is established to serve. It is the number of loans divided by the library's legal service area population.

This measure indicates the average number of loans made to each resident of the library's legal service area annually.

This output measure may be relevant whenever the size of the materials budget, the size of the collection, or its level of use is an issue. It may be useful to examine the relationship of this measure to selected input & output measures. For example, lower Circulation Per Capita is a likely result of lower Materials Expenditures & Holdings Per Capita & a lower Acquisition Rate. It is also likely to lead to more ILLs Per 1,000 Circulation.

TURNOVER RATE

Turnover Rate relates the number of loans of library materials to the size of the collection. It is the number of loans divided by the number of titles held in the collection at the end of the year.

This measure indicates the number of times each item in the collection was loaned, assuming that circulation was evenly distributed among the library's holdings.

This output measure may be relevant whenever use of the collection is an issue. In that case, it may be useful to compare this figure to selected inputs (such as Holdings Per Capita and Acquisition Rate) and outputs (such as Circulation Per Capita and ILLs Per 1,000 Circulation).

ILL NET LENDING RATE

ILL Net Lending Rate relates the number of materials provided to other libraries through interlibrary loan to the number of materials borrowed from other libraries thorugh interlibrary loan. It is the number of items loaned divided by the number of items borrowed.

This measure indicates items loaned as a percentage of items borrowed.

This output measure may be relevant whenever the nature of the library's participation in interlibrary loan activities is an issue. It indicates whether the library does more lending (scoring over 1.0) or more borrowing (scoring less than 1.0). "Net Borrowers" may use this figure as evidence of what they gain from participating in such activities, while "net lenders" may use it to argue that the strengths of their collections need to be maintained.

ILLS PER 1,000 CIRCULATION

ILLs Per 1,000 Circulation relates the number of materials borrowed from other libraries to the number of materials from the local collection made available to borrowers. It is the number of ILL requests divided by total circulation multiplied by 1,000.

This measure indicates the number of interlibrary loans for every 1,000 items circulated from the local collection.

On the one hand, higher ILLs Per 1,000 Circulation might indicate better performance by the library as an access point for information not contained in the local collection. On the other, a lower figure might indicate that the local collection was doing a better job of meeting user needs. Which interpretation to make of this statistic would depend on which issue was at hand as well as the actual amount of ILL and circulation activity per capita. (Higher levels of ILL and circulation activity would favor the former interpretation, while lower levels of such activity would favor the latter interpretation.)

PROGRAM ATTENDANCE PER CAPITA

Program Attendance Per Capita relates attendance of scheduled presentations which are sponsored by the library and deal with information services (on or off library premises) to the number of persons the library is established to serve. It is program attendance divided by the library's legal service area population.

Program Attendance Per Capita indicates the percentage of residents of the library's legal service area who attended a library program during the year.

This output measure may be relevant whenever the library needs to demonstrate its services to groups (in contrast to traditional services to individuals, such as circulation and reference).

INPUT MEASURES

SERVICE POPULATION PER STAFF

Service Population Per Staff relates the number of persons in the library's legal service area to the number of full-time equivalent (FTE) staff. It is the number of persons in that area divided by the number of library staff in FTEs.

Full-time equivalent (FTE) staff is the total number of hours per week worked by all staff divided by 40. In this context, full-time means 40 hours per week, regardless of how many hours per week the library is open.

Service Population Per Staff measures the potential workload to be carried by each member of the library staff. It indicates the average number of persons each member of the staff might serve.

This input measure may be relevant whenever the adequacy of library staffing and staff funding are issues. It is particularly useful when the population or geographical area which the library is established to serve increases dramatically. When that happens, there should be a corresponding increase in staff just to offset the population increase.

HOLDINGS PER CAPITA

Holdings Per Capita relates the number of titles in the library's collection to the number of persons it was established to serve. It is the number of print as well as non-print titles held by the library divided by its legal service area population.

This figure indicates the average number of titles held for each person in the library's legal service area population.

This input measure may be relevant whenever the size of the library's collection is an issue. It is particularly useful when the population or geographical area which the library is established to serve changes dramatically. For example, in the latter case, there should be corresponding increases in Materials Expenditures as well as Holdings Per Capita just to maintain the existing ratio of holdings to persons served.

ACQUISITION RATE

Acquisition Rate relates the number of new acquisitions to the overall size of the collection. It is the number of newly acquired titles divided by the number of titles held by the library (including new ones).

This figure indicates the percentage of the library's collection which was acquired during the year. To that extent, it is a measure of the growth of the collection, if not its currency. (All newly acquired titles are not necessarily newly published.)

Acquisition rate may be relevant whenever the growth or currency of the collection is an issue. When using this figure to address such issues, it may be useful to relate it to the input measure, Materials Expenditures Per Capita, or output measures which indicate the impact of such spending on use of the collection (such as Circulation and In-Library Use Per Capita, ILL Net Lending Rate, and ILLs Per 1,000 Circulation).

STAFF EXPENDITURES PER CAPITA

Staff Expenditures Per Capita relates the amount of library funds spent on staff to the number of persons the library was established to serve. It is the dollar amount paid in salaries, wages, and benefits divided by the library's legal service area population.

This figure indicates the average cost per person of staffing the library.

This input measure may be relevant whenever the adequacy of library staffing or staff performance are issues. The cost-effectiveness of library services may be demonstrated by relating Staff Expenditures Per Capita to output measures which indicate the amount of service received (such as, Circulation, Reference Transactions, and Program Attendance Per Capita).

It is also important to review this measure whenever the population of the library's legal service area changes dramatically. For example, if that population increases dramatically, there should be a corresponding increase in Staff Expenditures Per Capita just to maintain the existing level of support.

MATERIALS EXPENDITURES PER CAPITA

Materials Expenditures Per Capita relates the amount of library funds spent on materials for the collection (including print items, such as books & periodicals, and non-print items, such as audio and video cassettes and films) to the number of persons the library was established to serve. It is the dollar amount spent on such materials divided by the library's legal service area population.

This figure indicates the average cost per person of purchasing (but not processing) newly acquired materials.

Materials Expenditures Per Capita may be relevant whenever the size or usefulness of the collection is an issue. When using this figure to address such issues, it may be useful to relate it to other input measures which indicate the quantity of materials available to users (such as *Holdings Per Capita* and *Acquisition Rate*) and to output measures which indicate the usefulness of those materials (such as *Circulation Per Capita*, *Turnover Rate*, *ILL Net Lending Rate*, and *ILLs Per 1,000 Circulation*).

It is also important to review this measure whenever the population of the library's legal service area changes dramatically. For example, if the population to be served increases dramatically, there should be a corresponding increase in *Materials Expenditures Per Capita* just to maintain the existing level of support.

MISCELLANEOUS EXPENDITURES PER CAPITA

Miscellaneous Expenditures Per Capita relates the amount of library funds spent for purposes other than staff & materials costs) to the number of persons the library is established to serve. It may include the dollar amount spent on miscellaneous operating expenses (including utilities, telephone and telecommunications, and office supplies) *divided by* the library's legal service area population.

This figure approximates the average cost per person of running library facilities.

This input measure may be relevant whenever the economy or efficiency of the library's day-to-day operations is an issue. The cost-effectiveness of library operations may be demonstrated by relating *Miscellaneous Expenditures Per Capita* to those output measures which best reflect the range of most frequently used services & programs the library provides to its users.

It is also important to review this measure whenever the population of the library's legal service area changes dramatically. For example, if the population to be served increases dramatically, there should be a corresponding increase in *Miscellaneous Expenditures Per Capita* just to maintain the existing level of support.

OPERATING EXPENDITURES PER CAPITA

Operating Expenditures Per Capita relates the total amount of library funds spent for all purposes to the number of persons the library is established to serve. It includes the dollar amount spent on staff, materials, and miscellaneous expenses *divided by* the library's legal service area population.

This figure approximates the average cost per person of running the library.

Operating Expenditures Per Capita may be relevant whenever the economy or efficiency of the library's overall operation is an issue. The cost-effectiveness of library operations may be demonstrated by relating Operating Expenditures Per Capita to those output measures which best reflect the range of most frequently used services & programs the library provides to its users.

It is also important to review this measure whenever the population of the library's legal service area changes dramatically. For example, if the population to be served increases dramatically, there should be a corresponding increase in Operating Expenditures Per Capita just to maintain the existing level of support.

FORMULAS FOR INPUT-OUTPUT MEASURES

OUTPUT MEASURES

Registration Per Capita	(p4+(p5x2.59))/p1
Library Attendance Per Capita	(p102x50)/p1
In-Library Use Per Capita	(p103x50)/p1
Reference Per Capita	(p104x50)/p1
Circulation Per Capita	p108/p1
Turnover Rate (Circulation/Holdings)	p108/(p73+p76+p79+p81+p84 +p87+p90+p93+p96)
ILL Net Lending Rate	p113/p114
Program Attendance Per Capita	p110/p1

INPUT MEASURES

Service Population Per Capita	p1/p14
Holdings Per Capita	(p73+p76+p79+p81+p84+p87 +p90+p93+p96)/p1
Acquisition Rate	(p71+p74+p77+p80+p82+p85+ p88+p91+p94)/(p73+p76+p79+ p81+p84+p87+p90+p93+p96)
Staff Expenditures Per Capita	p44/p1
Materials Expenditures Per Capita	p52/p1
Miscellaneous Expenditures Per Capita	p56/p1
Total Operating Expenditures Per Capita	(p44+p52+p56)/p1

APPENDIX

Higher Education General Information Survey (HEGIS XX) - FY 1985

INTRODUCTION

This publication is the Library Research Program's first effort to provide Colorado's academic libraries with statistics and input-output measures which may be found useful in planning, budgeting, and promoting awareness. These figures are already being used by the State Library in the development of a new long range plan for library development in Colorado.

In addition, during the next few years, at least two major projects will be under way at the national level to improve data sharing and data use among academic libraries. One is the development of the Integrated Post-secondary Education Data System (IPEDS) and the other is the publication of performance measures for academic libraries by the Association of College and Research Libraries (ACRL).

In FY 1988, the library survey which has been conducted every three years as part of HEGIS will become a quadrennial survey in IPEDS. (Copies of the IPEDS survey form and instructions were sent to all Colorado academic libraries earlier this year.) For the first time, this system will integrate library data with other institutional data collected by the Center for Statistics. In cooperation with the Colorado Commission on Higher Education, the State Library will promote academic library participation in this survey and will validate the data before it is reported to the Center.

Because IPEDS surveys will be even more infrequent than the HEGIS surveys, the State Library will conduct a comparable survey of Colorado academic libraries two years after each IPEDS survey. That will provide up to date figures every two years, instead of every four.

In August 1988, ACRL plans to publish performance measures for academic libraries. At the American Library Association's 1987 Mid-Winter Meetings, the ACRL Committee on Performance Measures reported that a first draft is expected by November 1987. It will be reviewed at and revised following ALA's January 1988 Mid-Winter Meetings and June 1988 Annual Meetings. The product of this project will be the academic counterpart to the forthcoming second edition of Output Measures for Public Libraries. The State Library is keeping up to date on this project and will report on it to academic libraries as news warrants.

In the absence of such measures, this publication reports several inputs and outputs in raw form and per student (FTE enrollment) and per program (counting all degree programs from associate to doctoral levels). Comments from the academic library community on the usefulness of these measures as well as any corrections or recommendations for changes or additions are encouraged and should be directed to Keith Lance, Library Research Program, Colorado State Library, 201 E. Colfax, Denver, CO 80203 (866-6737).

Higher Education General Information Survey (HEGIS XX)

College and University Libraries - Fall 1985

This form is authorized by law (20 U.S.C. 1221 e-1). While you are not required to respond, your cooperation is needed to make the results of this survey comprehensive, accurate, and timely.

DUE DATE: NOVEMBER 30, 1985

1 NAME AND MAILING ADDRESS OF INSTITUTION OR CAMPUS COVERED BY THIS REPORT
(See Definitions of Institutions on this page.) (Include City, State and Zip Code.)

2 FICE CODE NUMBER

3 NAME AND TITLE OF RESPONDENT

4 TELEPHONE NUMBER OF RESPONDENT
(area code, local number, and extension)

5 PLEASE NOTE THAT EACH INSTITUTION, BRANCH, CAMPUS OR OTHER ENTITY SEPARATELY CERTIFIED BY THE ELIGIBILITY AND AGENCY EVALUATION STAFF OF THE U.S. DEPARTMENT OF EDUCATION, WITH ITS OWN FICE CODE, AND LISTED SEPARATELY IN THE **EDUCATION DIRECTORY–COLLEGES AND UNIVERSITIES,** SHOULD BE REPORTED ON A SEPARATE SURVEY FORM AND NOT INCLUDED OR COMBINED WITH ANY OTHER SUCH CERTIFIED UNIT. BRANCHES, CAMPUSES, AND OTHER ORGANIZATIONAL ENTITIES NOT SEPARATELY CERTIFIED SHOULD BE INCLUDED WITH THE APPROPRIATE INSTITUTION OR BRANCH REPORT. IF SUCH ARE INCLUDED IN THIS REPORT, PLEASE LIST THEM BELOW.

ARE DATA FOR THIS UNIT INCLUDED IN THIS REPORT?	NAME OF BRANCH AND/OR OTHER CAMPUS	ADDRESS (CITY, STATE, AND ZIP CODE)
☐ YES ☐ NO		
☐ YES ☐ NO		
☐ YES ☐ NO		

6 IF THE EDUCATIONAL ORGANIZATION OR ENTITY COVERED BY THIS SURVEY REPORT IS PART OF A MULTI-CAMPUS INSTITUTION, OR PART OF A SYSTEM OF INSTITUTIONS, PLEASE ENTER THE NAME OF THE INSTITUTION OR SYSTEM BELOW. IF NOT APPLICABLE, CHECK HERE ☐

Definitions of Institutions

Institutional System. A complex of two or more institutions of higher education, each separately organized or independently administered, under the control of a single administrative body.

Multi-Campus Institution. An organization resembling an institutional system, but clearly designed as a single institution with either of two organizational structures: (1) an institution having two or more campuses responsible to a central administration (which central administration may or may not be located on one of the administratively equal campuses) or (2) an institution having a main campus with one or more branch campuses.

Main Campus. In those institutions comprised of a main campus and one or more branch campuses, the main campus (sometimes called the parent institution) is usually the location of the core, primary, or most comprehensive program. (Unless the institution-wide or central administrative office for such institutions is reported to be at a different location, the main campus is understood to be the location of the central administrative office.)

Branch Campus. A campus of an institution of higher education which is located in a community different from that of its parent institution, that is, beyond a reasonable commuting distance from the main campus of the parent institution. To be considered a **branch campus,** rather than an **extension center,** the educational activities at the location must be organized on a relatively permanent basis (i.e., **have a relatively permanent administration)** and include course offerings for one or more complete college-level programs of at least one full year.

HIGHER EDUCATION GENERAL INFORMATION SURVEY

COLLEGE AND UNIVERSITY LIBRARIES, FALL 1985

DEFINITIONS AND INSTRUCTIONS

Please read the following explanations and instructions before completing this form.
Detach this portion and mail the completed form either directly to the NCES HEGIS Processing Center, POB 8637, Silver Spring, Maryland 20907 or to the HEGIS coordinator, if there is a HEGIS coordinator in your state.

In this form, basic data are requested on the collections, staff, expenditures, and developmental areas for college and university libraries. The compilations of these data have proven to be valuable tools for administrators, chief librarians, and others concerned with the improvement of library services to higher education.

GENERAL INSTRUCTIONS

LIBRARY. For the purpose of this survey, a library is defined as an organized collection of printed, microform, and audiovisual materials which (a) is administered as one or more units, (b) is located in one or more designated places, and (c) makes printed, microform, and audiovisual materials as well as necessary equipment and services of a staff accessible to students and to faculty. Report data on units meeting the above definition of a library which are a part of a learning resources center. Do not report data on instructional or other activities performed by learning resources centers which are not included in the definition of a library.

LIBRARY UNITS COVERED. A report should be submitted by each institution, campus or branch which has been certified by the Eligibility and Evaluation Staff of the U.S. Department of Education with its identification code and listed separately in the EDUCATION DIRECTORY, COLLEGES AND UNIVERSITIES. Data on libraries that are separately budgeted or housed (e.g., medicine, law extension center, research center, etc.) should be included in the report for the campus or branch where they are located.

TIME PERIOD COVERED. Data are requested for the following time periods:

(1) Fiscal year 1985 - a 12-month period between June 1, 1984 and September 30, 1985 which corresponds to your institution's fiscal year.

(2) Typical week in fall semester, 1985 - a typical week is one without holidays when the central or main library is open during its regular hours for general use.

(3) Fall 1985 - the point in time in the fall of 1985 when the survey form is being completed.

NEED FOR ESTIMATES. If an exact figure is not available for a particular item but the amount is known to be greater than zero, ENTER AN ESTIMATE OF THE AMOUNT. Indicate the fact that the figure is an estimate by parentheses ( ). Estimates are important if exact data are not available. Items which are left blank will be interpreted as zero or not relevant to your library. Request help from your business office in providing library expenditure and contracted salary and wage data.

FICE CODE NUMBER. Enter the FICE code number for your institution at the upper right hand corner of each page, in item captioned "FICE Code Number." This number is given in the upper right hand corner of the mailing label.

QUESTIONS. If you have questions or need more copies of this form, telephone Robert Thomas, at (202) 254-7351, Division of Multilevel Education Statistics, National Center for Education Statistics.

SPECIFIC INSTRUCTIONS

Part I-Number and Hours of Public Service Outlets, Fiscal Year 1985.

BRANCH LIBRARIES (line 1). Report the number of branch libraries at your institution that were open all or part of fiscal year 1985. (DO NOT COUNT THE MAIN OR CENTRAL LIBRARY.) Branch libraries are auxiliary units which have all of the following: (1) separate quarters, (2) a permanent basic collection of books, (3) a permanent staff, and (4) a regular schedule for opening to the public. They are, however, administered from a central unit and are part of an institution with the same FICE code as the central library.

TOTAL ANNUAL PUBLIC SERVICE HOURS (line 2). Report the total hours of public service of the main or central library and of all branches during fiscal year 1985. If the main library is open 60 hours per week (60 times 52 weeks = 3120), less 5 days of 10 hours each closed for holidays, the main library total is 3120 less 50 = 3070 hours. If 3 branch libraries are also open the same number of hours as the main library (regardless of whether or not all facilities are open at the same time) the annual aggregate for the library is 4 times 3070 = 12,280 hours.

Part II - Library Staff, Fall 1985

FULL-TIME EQUIVALENT (FTE) EMPLOYEES Report the sum of the number of full-time employees plus the number of full-time equivalent of the part-time employees To compute full-time equivalents of part-time employees, take the number of hours worked per week by a part-time employee and divide it by the number of hours CONSIDERED BY THE REPORTING LIBRARY TO BE A FULL-TIME WORK WEEK (E.g. 60 hours per week of part-time work divided by 40 hours per full-time week equals 1.5 FTE)

LIBRARIANS (line 3). Report the number of staff members doing work that requires professional training and skill in the theoretical or scientific aspect of library work, or both, as distinct from its mechanical or clerical aspect Include unfilled positions if search is currently underway.

ALL OTHER PAID STAFF (line 4). Report the total FTE for all other paid library staff in filled positions in Fall 1985 who are paid annual salaries If professional or nonprofessional staff in your library are paid hourly wages, yet fill positions which are salaried annually in most other libraries, they should also be included. Exclude maintenance and custodial staff.

CONTRIBUTED SERVICES STAFF (line 5). Report the FTE of contributed services staff. Contributed services staff should be reported only by religious institutions or institutions affiliated with religious or theological organizations. Publicly controlled institutions receiving volunteer or contributed services (if any) should exclude data respecting such services in this report.

STUDENT ASSISTANCE FROM ALL FUNDING SOURCES (line 6) Report the total FTE for student assistance, by students employed on an hourly basis whose wages are charged either to the library budget or to a budget other than the library budget. Exclude maintenance and custodial staff.

TOTAL STAFF (line 7). Report the sum of lines 3, 4, 5 and 6.

PART III - LIBRARY OPERATING EXPENDITURES, FISCAL YEAR 1985

PART III has been divided into two sections to facilitate reporting. All operating expenditures should be reported in Section A, Standard Operating Expenditures, which includes lines for items that appear in most library operating budgets. Section B, Selected Special Expenditures, includes lines for expenditures which may appear in different places on different library budgets. (For example, online database searching may be considered collection expenditures in some libraries. In others, it may be reported under "other operating expenditures.") Amounts reported in Section B *should have been reported in Section A*, most likely as "other operating expenditures." They are requested here, however, so that trends in these important areas may be documented.

EXPENDITURES (lines 8-24). Report the funds expended in fiscal year 1985 regardless of when the funds may have been received from Federal, State, or other resources. Expenditures should be reported for the 12-month period which corresponds to your library's fiscal year between the calendar period of June 1, 1984 to September 30, 1985. Report all expenditures in whole dollars; omit cents.

SECTION A Standard Operating Expenditures

SALARIES AND WAGES (line 8) Report expenditures for full-time and part-time salaries and wages before deductions but exclude fringe benefits provided by your institution for all regular library staff. Exclude contributed services maintenance and custodial staff and students serving on an hourly basis

FRINGE BENEFITS (line 9) Report the sum of all fringe benefits provided by your institution for all library staff whose salaries and wages are shown on line 8 (exclude maintenance and custodial staff and students serving on an hourly basis) Fringe benefits are defined as cash contributions in the form of supplementary or deferred compensation other than salary The employee's contribution should be excluded when determining the dollar value of fringe benefits. Fringe benefits include: retirement plans; hospitalization, surgical, and medical plans; guaranteed disability income protection plans; tuition plans; housing plans; social security taxes; unemployment compensation plans; group life insurance plans; workmen's compensation; and other benefits in-kind with cash options.

PRINT MATERIALS (line 10). Report expenditures for all materials consisting primarily of words and usually produced by making an impression with ink on paper. Included in this category are materials that do not require magnification: books, government documents, braille materials, ephemeral print materials, and the like. Exclude serial subscriptions and microforms.

SERIAL SUBSCRIPTIONS (line 11). Report expenditures for all publications issued in successive parts, usually at regular intervals, and as a rule, intended to be continued indefinitely. Serials include periodicals, newspapers, annual (reports, yearbooks, etc.), memoirs, proceedings, and transactions of societies; they may include monographic and publishers' series.

MICROFORMS (line 12). Report expenditures for all photographic reproductions of textual, tabular, or graphic materials reduced in size so that they can be used only with magnification. The two main types of microforms are microreproductions on transparent material (roll microfilm, aperture cards, microfiche, and ultrafiche) and reproductions on opaque materials. Excluded serial subscriptions.

COMPUTER SOFTWARE (line 13). Report expenditures for all programs, procedures, and associated documentation that instruct the computer to perform certain types of tasks, in contrast to the physical components of a computer (hardware).

AUDIOVISUAL MATERIALS (line 14). Report expenditures for all library materials that are displayed by visual projection or magnification or through sound reproduction, or both, including graphic materials, audio materials, motion pictures, video materials, and special visual materials such as cartographic and three-dimentional materials.

OTHER (line 15). Report any expenditures for other collection materials not placed in lines 10 to 14.

BINDING AND REBINDING (line 16). Report only expenditures paid to commercial binderies for all binding and rebinding of books and periodicals during the 1985 fiscal year. Do not allocate wages, materials, etc., for binding.

EQUIPMENT (line 17). Report only expenditures for all library equipment purchased during 1985 fiscal year. Include microform equipment, audiovisual equipment and computer related equipment.

ALL OTHER OPERATING EXPENDITURES (line 18). Report expenditures for travel, rental, leases, insurance, postage and freight, printing, replacement of equipment and furnishings, supplies and membership costs. Exclude expenditures for utilities, plant maintenance and operation, and capital outlay.

SECTION B. Selected Special Expenditures
Note: These expenditures should have been included in lines 8 to 18.

POSTAGE (line 20). Report all expenditures for postage and delivery, including U.S. Mail and commercial delivery services during the 1985 fiscal year.

TELECOMMUNICATIONS (line 21). Report any separately billed expenditures for all types of telephone services and for such services as electronic mail, teleconferencing, telefacsimile, teletype, telex, etc.

CONTRACTED COMPUTER SERVICES (line 22). Report any costs related to purchased library services done for your library on computers by a computerized library network, computerized cooperative library organization, or by a commercial organization providing library services. Telecommunications costs may be included.

ONLINE DATABASE SEARCHING (line 23). Report any expenditures for all reference transactions in which the source utilized is one or more databases searched online by computer.

COMPUTER HARDWARE (line 24). Report any costs related to the purchase of computers, printers, or any physical component of a computer.

PART IV - LIBRARY COLLECTIONS, FISCAL YEAR 1985

TOTAL NUMBER ADDED DURING FISCAL YEAR. Report the number added. Do not subtract the number withdrawn.

TOTAL NUMBER HELD AT END OF FISCAL YEAR. Self-explanatory.

BOOKS. Nonperiodical printed publications bound in hard or soft covers, or in loose-leaf format, of at least forty-nine pages, exclusive of the cover pages, or a juvenile nonperiodical publication of any length bound in hard or soft covers.

SERIALS. Publications issued in successive parts, usually at regular intervals, and as a rule, intended to be continued indefinitely. Serials include periodicals, newspaper, annual (reports, yearbooks, etc.), memoirs, proceedings, and transactions of societies; they may include monographic and publishers' series.

GOVERNMENT DOCUMENTS. Any publication in book, serial, or other form of library materials that are published by a government agency, e.g., the publication of federal, state, local, and foreign governments and of intergovernmental organizations to which governments belong and appoint representatives, such as the United Nations, Organization of American States, and the Erie Basin Commission.

PERIODICALS. A publication in any medium intended to appear indefinitely at regular or stated intervals, generally more frequently than annually. Individual issues are numbered consecutively or dated and normally contain separate articles, stories, or other writings. Do not include newspapers disseminating general news, and the proceedings, papers, or other publications of corporate bodies primarily related to their meetings.

NEWSPAPER. Those serials that are designed mainly to be a primary source of written information on current events. They may also include articles as well as illustrations, advertising, legal notices, and vital statistics. Newspapers appear with a masthead and are usually printed on newsprint without a cover.

VOLUMES (line 25). For reporting purposes, a volume is a physical unit of any printed, typewritten, handwritten, mimeographed, or processed work, contained in one binding or portfolio, handbound or paperbound, which has been cataloged, classified, or otherwise made ready for use.

TITLES (line 26). For reporting purposes, a title is a publication which forms a separate bibliographic whole, whether issued in one or several volumes, reels, disks, slides, or parts. It applies equally to printed materials, such as books and periodicals, as well as to audiovisual materials and microforms. Report the number of items for which a separate shelflist card has been made. (SHELFLIST: A record of materials in a library, arranged in the order in which the materials stand when they are shelved or stored.) Thus, six copies of the same edition of a title count as one title; two editions of the same title which have been cataloged or recorded separately count as two titles; a set of six items for which six shelflist cards have been made count as six titles; and two sets of the same edition for which one shelflist card has been made count as one title.

METHOD FOR ESTIMATING THE NUMBER OF TITLES IN THE COLLECTION:

A library which does not maintain a title count of its various collections and which cannot easily count the number of separate shelflist cards should use the following method for estimating this count:

1. Pressing the cards tightly together, measure the total number of inches in the shelflist.
2. Using the same amount of pressure, measure one inch of cards in the shelflist. Count the number of titles contained in the inch.
3. Repeat step 2 at regular intervals (for example, count one inch in every foot, or in every three feet, or other pre-established intervals) to ensure measuring at least seven sample inches distributed throughout the shelflist.
4. Average the number of titles per inch in the samples. If any sample varies from the average by more than four cards, repeat steps one through four, applying more even pressure to the cards.
5. Multiply the average titles per inch by the total number of inches of cards in the shelflist.

CURRENT SERIAL SUBSCRIPTIONS (line 28). Report the number of titles subscribed to, and not the number of individual issues (exclude duplicate subscriptions). Include periodicals, newspapers, and government documents issued serially.

MICROFORMS (lines 29-32). Report the number of titles of materials that have been photographically reduced in size for storage, protection, and inexpensive publication purposes, and which must be read with the help of enlarging instruments. Examples of microforms are: microfilm, microcard, and microfiche. These are also called microcopy and microtes.

MANUSCRIPTS AND ARCHIVES (line 33). Report the linear feet of shelfspace occupied by these materials. Manuscripts are handwritten or typed documents, including carbon copies. Archives are nonrecurrent records of an organization or institution preserved because of their continuing value.

CARTOGRAPHIC MATERIALS (line 34). Report the number of units of materials representing in whole or in part the earth or any celestial body at any scale. These materials include two- and three-dimensional maps and globes.

GRAPHIC MATERIALS (line 35). Report the number of units of materials for viewing without sound. The materials may or may not be projected or magnified. They include art originals, art prints, art reproductions, slides, transparencies, filmstrips, photographs, pictures, postcards, posters, study prints, and the like.

AUDIO MATERIALS (line 36). Report the number of titles of materials on which sounds (only) are stored (recorded) and that can be reproduced (played back) mechanically or electronically, or both. These materials include audiocassettes, audiocartridges, audiodiscs, audioreels, talking books, and other sound recordings.

FILMS (line 37). Report the number of titles of films, a term which is used interchangeably with "motion picture" which is a length of film, with or without recorded sound, bearing a sequence of images that create the illusion of movement when projected in rapid succession (usually 16 or 24 frames per sound). Motion pictures are produced in a variety of sizes (8, super 8, 16, 35, 55, and 70 mm) and a variety of formats (cartridge, cassette, loop, and reel). Common motion picture sizes in instructional use are 8mm, supper 8mm, and 16mm.

VIDEO MATERIALS (line 38). Report the number of titles of materials on which both pictures and sound are recorded. Electronic playback reproduces both pictures and sounds using a television receiver or monitor.

MACHINE-READABLE MATERIALS (line 39). Report the number of titles of materials in a form designed to be processed by a machine, usually a computer, either as input or as output, that have data recorded on them in some form. These materials include data files and computer program files. Typically, these files are stored on such media as punched cards, paper type, magnetic tape and disks, and digital videodisks. These materials excludes computer outputs that are eye-legible or can be read with magnification. Include microcomputer software in this category.

OTHER LIBRARY MATERIALS (line 40). Report here any materials not already included in lines 25-39.

PART V - LIBRARY LOAN TRANSACTIONS, FISCAL YEAR 1985

CIRCULATION TRANSACTIONS (lines 41-42). Report the number of items lent from the general and reserve collections of the library for use usually (although not always) outside the library. These activities include charging, either manually or electronically, and also renewals, each of which is reported as a circulation transaction.

RESERVE COLLECTION are those materials that have been removed from the general library collection and set aside in a library so that they will be on hand for a certain course of study or activity in process. Usually, the circulation and length of loan of items in a reserve collection are restricted so that these items will be available to many users who have need of them within a limited time period.

INTERLIBRARY LOANS (lines 43-44). Report the number of transactions in which library materials, or copies of the materials, are made available by one library to another upon request. Loans include both lending and borrowing. The libraries involved in interlibrary loan *are not* under the same administration or on the same campus.

PART VI - LIBRARY SERVICE PER TYPICAL WEEK, FALL 1985

Collect data during a typical week in the fall and report the numbers here. A typical week is defined as a week in which the library is open for its regular hours and contains no holidays. It is seven consecutive calendar days, from Sunday through Saturday, or whatever days the library is normally open that period. If data are available for an entire year rather than for a typical week, then estimate a weekly count by dividing the annual figure by 52.

PUBLIC SERVICE HOURS PER TYPICAL WEEK (line 45). Consider both main library and branches using the following method. If a library is open from 9:00 a.m. to 5:00 p.m. Monday through Friday, it should report 40 hours per week. If several of its branches are also open during those hours, the figure remains 40 hours. Should Branch A also be open one evening from 7:00 to 9:00, the total hours which users can find service becomes 42. If Branch B is open the same hours on the same evening the total remains 42, but if it is open 2 hours on another evening, or from 5:00 to 7:00 on the evening when Branch A is open later, the total becomes 44 hours during which users can find service.

TOTAL ATTENDANCE IN LIBRARY PER TYPICAL WEEK (line 46). Report the total number of persons entering the library per typical week, including persons attending activities, meetings, and those persons requiring no staff services.

IN-LIBRARY USE OF LIBRARY MATERIALS PER TYPICAL WEEK (line 47). Report the total number of materials utilized in the library, but not checked out. These materials include reference books, periodicals, book stock, and all other library materials that are used WITHIN the library.

TOTAL REFERENCE TRANSACTIONS PER TYPICAL WEEK (line 48). Report the total reference transactions per typical week. A reference transaction is an information contact which involved the knowledge, use, recommendations, interpretation, or instruction in the use of one or more information sources by a member of the library staff. Information sources include printed and non-printed materials, machine-readable databases (including computer-assisted instruction), catalogs and other holdings, records, and, through communication or referral, other libraries and institutions, and persons both inside and outside the library. Include information and referral services. A contact that includes both reference and directional services should be reported as one reference transaction. When a staff member utilizes information gained from previous use of information sources to answer a question, report as a reference transaction, even if the source is not consulted again during this transaction. Duration should not be an element in determining whether a transaction is reference of directional.

TOTAL DIRECTIONAL TRANSACTIONS PER TYPICAL WEEK (line 49). Report the total directional transactions per typical week. A directional transaction is an information contact which facilitates the use of the library in which the contact occurs and which does NOT involve the knowledge, use, recommendation, interpretation, or instruction in the use of, any information sources other than those which describe that library, such as schedules, floor plans, handbooks, and policy statements. Examples of directional transactions include giving instruction for locating, withing the library, staff, library users, or physical features, etc., and giving assistance of a non-bibliographic nature with machines.

INFORMATION SERVICE TO GROUPS (line 50-51). Report the total number of presentations per typical week on line 50 and the total members of persons served on line 51. An information contact is one which a staff member or person invited by a staff member provides information intended for a number of persons and planned in advance. Information service to groups may be either
raphic instruction or library use presentations, or it may be
recreational, or educational presentations. Presentations
and off the library premises are included, as long as
sponsored by the library. Do not include meetings spons
other groups using library meeting rooms.

FOREWORD

This document reports the results of the Special Library Annual Survey, 1985, conducted in early 1986. It includes both simple statistics and input-output measures for special libraries. The 59 responding libraries are divided into three groups based on their funding status: public, private--non-profit, and private--for profit. The responses are also coded by collection coverage and Regional Library Service System.

Input-output measures permit libraries to compare their resources and performance with those of other libraries, despite the differing sizes of their service populations, staffs, collections, and the like. These measures can be extremely useful for justifying budgets and doing public relations for libraries. They are also the component of the developing Colorado Council for Library Development Long Range Plan which will permit monitoring and assessment of its implementation.

In addition to reporting the data contributed by survey respondents, this document includes an example of how to analyze the figures and a discussion of the implications of such analysis for budgeting, planning, and public relations by special libraries.

Questions, corrections, and comments concerning these statistics and input-output measures are very welcome, and may be directed to Keith Lance, Project Director, Long Range Planning for Libraries, Colorado State Library, 201 E. Colfax, Denver, CO 80203 (866-6737).

COMPARISON OF INPUT--OUTPUT MEASURES FOR X LIBRARY AND ALL PUBLIC SPECIAL LIBRARIES

	X Library	Public Special Libraries
INPUT MEASURES		
Primary Users Per FTE Staff	517	1,427
Staff Expenditures Per Capita	$37.73	$134.07
Titles Held Per Capita	2.22	140.19
Acquisition Rate	.07	.04
Materials Expenditures Per Capita	$23.27	$ 55.91
Other Expenditures Per Capita	$ 6.67	$ 29.95
OUTPUT MEASURES		
Circulation Per Capita	2.80	13.03
Turnover Rate	1.26	.52
In-Library Use Per Capita	1.50	2.90
Reference Per Capita	.63	25.12
Database Searches as % Reference	1.16	.05
ILLs Lent as % ILLs Requested	.28	.58
ILL Requests as % Circulation	.58	.03

BUDGETING, PLANNING, AND DOING PUBLIC RELATIONS WITH INPUT-OUTPUT MEASURES FOR SPECIAL LIBRARIES

At least two general conclusions may be drawn from the input-output measures reported for X Library and other public special libraries:

1. On most input and output measures, X Library compares poorly with all public special libraries.
2. Lower outputs seem to follow from lower inputs.

The size of X Library's staff relative to its primary user population appears to be quite adequate. Its staff serve only about one-third as many users as other public special libraries. The level of staffing at X Library, however, is another matter. Users of that library contribute less than one-third as much to compensate staff as their counterparts at the other libraries. That makes it likely that the staff of X library has less professional training than other public special library staff. This interpretation is supported by the fact that X Library's collection circulates less, is used less by visitors to the library, and is used less by staff to answer reference questions.

The size of X Library's collection relative to its primary user population compares very unfavorably with the size of collections at other public special libraries. It is not difficult to understand how a larger collection failed to develop at X Library, considering that its users contribute less than half as much to purchase materials as users of the other libraries. The inadquacy of the library's collection is also suggested by the fact that X Library relies much more heavily than the other libraries on interlibrary loan to provide information not available in its collection.

Given these interpretations of this data, what strategies might be used by X Library's director to respond to its circumstances?

Certainly, in defending the library's budget, the relationship between inputs and outputs should be emphasized. Apparently, X agency is getting what it is paying for--or, more to the point, not getting what it is not paying for. The need for greater investments in staff, materials, and general operations is evident.

The lower use made of X Library's collection and its correspondingly higher reliance on interlibrary loan may indicate that the library's director needs to assess its users' information needs and to begin to acquire materials which are more likely to be useful. Conversely, however, the lower figures reported by X Library on collection-related inputs and outputs may indicate a deliberate decision about the library's role.

Many special libraries opt to be access points for information rather than depositories of it. X Library's higher use of database searching in responding to reference questions, its lower proportion of interlibrary loans to requests, and its higher proportion of interlibrary loan requests to local circulation might suggest that interpretation. That is questionable, however, due to the lower number of reference questions as well as the smaller expenditures on staff and general operations in relation to X Library's primary user population.

At the very least, these figures indicate that X Library's role needs to be clarified. Once that is done, appropriate input-output measures may be targeted for change in the library's plan. For instance, if the library's role is to be an access point for needed information, its plan might include objectives to increase certain inputs--such as staff and other operating expenditures per capita--and outputs--such as reference per capita, database searches as a percent of reference, ILLs lent as a percent of ILLs requested, and ILL requests as a percent of circulation. If the library's role is to be a depository of useful information, the plan might include objectives to increase certain other inputs--such as titles held per capita, acquisition rate, and materials expenditures per capita--and outputs--such as circulation and in-library use per capita and turnover rate.

In addition to their budgeting and planning applications, input-output measures may prove useful in publicizing library services to the user population. In this example, for instance, the fact that X Library reports lower figures on several output measures may indicate nothing more than a need to make library users more aware of the range of information services available to them.

February 13, 1987

INTRODUCTION

The statistics reported in this publication were collected in the Colorado School Library Media Center Survey 1985 which was administered between November 1985 and March 1986. This survey was the first such effort at the state level in at least ten years.

Response to the survey was substantial; completed surveys were received from more than 75% of all school library media centers in the state and from more than 75% of all Colorado school districts.

Summary statistics are provided for elementary and secondary schools in districts of varying sizes and the state. It is hoped that school library media center staff will find these statistics useful as they plan and budget for the future. For planning purposes, these statistics provide baseline data about the current status of library media programs and ranges within which measurable objectives may be set. For budget purposes, these same statistics provide some bases for comparison which may help school and/or district administrators and others put a library media center's request budget in perspective.

If any reader has any comments about this publication--questions, suggestions, or corrections--we are interested in hearing from them and will be pleased to provide any assistance needed to make use of the statistics for planning or budgeting purposes. All of the data reported in this publication is part of an automated database which is readily accessible to respond to specific requests for other summary or comparative statistics.

Let us hear from you.

Keith Curry Lance Project Director Long Range Planning for Libraries (303) 866-6737	John Hempstead Consultant School Library Media Center Development (303) 866-6730

ORGANIZATION OF THIS REPORT

This report is divided into two parts: one for library media centers (LMCs) in elementary schools (K-5 or 6) and another for LMCs in secondary schools (junior high, middle, high, junior-senior high, and K-12). It includes responses to the Colorado School Library Media Center Survey 1985 for approximately 465 elementary and 355 secondary schools.

For each type of school, the data are reported by the six district enrollment ranges used by the Colorado Department of Education: under 300, 301-600, 600-1,200, 1,200-6,000, 6,000-25,000, and over 25,000. (NOTE: LMC statistics for K-12 schools may also be compared with corresponding summary statistics for LMCs in elementary schools.) Within each of these ranges, responding school districts are listed alphabetically by county and Regional Library Service System (see System Map). Summary statistics by enrollment range (for all but the smallest returns) include: total, highest, average, and lowest values as well as the percent of responding libraries in that enrollment range which reported on each data item.

Although the number of responding LMCs (over 820) makes it prohibitive to report this data by school, an alphabetical list of respondents by district is provided at the back of this volume.

While data are reported for elementary and secondary schools for over 75% of school districts, a 100% response was not received from each of these districts. For this reason, readers are discouraged from comparing unadjusted data (particularly totals) across districts, except in those cases where a full response can be verified.

To make the data more comparable, several items are adjusted for enrollment. Comparisons of unadjusted data, if made at all, should be restricted to highest, average, and lowest values as well as percent reporting for each enrollment range.

Abbreviations are used to designate many of the data items, and codes, to represent some responses. Following these organizational notes is a list of the data items which deciphers these abbreviations and codes. Readers are encouraged to read it before examining the statistics and to consult it as needed thereafter.

COLORADO SCHOOL LIBRARY MEDIA CENTER STATISTICS, 1985

DATA LIST

Including Abbreviations and Codes

DISTRICT	Name of a school district from which responses to the Colorado School Library Media Center Survey 1985 were received. Consult the list at the end of this volume to determine which elementary and/or secondary schools in that district are included in this data.
COUNTY	County or counties in which a responding school district is located.
REGIONAL LIB SVC SYSTEM	Regional Library Service System served by that county. See the System Map included in this report to identify the System in which a county is located.
District Enrollment Range	Range within which the total enrollment of all elementary and secondary schools in the district is located.
Fall 1985 Enrollment	Total enrollment for elementary or secondary schools which reported from that district. NOTE: Because elementary and secondary school LMC data are reported separately, this figure may not fall within the designated district enrollment range.

Highest Degree--Coordinator/Staff in Bldg

Highest degrees held by the library media coordinator and building-level library media staff in the district.

Degrees are coded as follows: master's degree in library science or media (6), other graduate degree (5), bachelor's degree plus 18 hours in media (qualifications for media endorsement--4), bachelor's degree with teacher certification (3), other bachelor's degree (2), and less than bachelor's degree (1).

Hours Worked in LMC/Typical Week

Hours worked in the library media center during a typical week by Media Endorsed staff, Other Staff, Students, and Volunteers.

Students Per Media Endsd Hr

Students per media endorsed hour. This adjusted figure divides Fall 1985 enrollment by the number of hours for media endorsed staff to indicate the maximum number of students whom media endorsed staff might be able to serve during a single hour.

Students Per Any Staff Hr

Students per any staff hour. This adjusted figure divides Fall 1985 enrollment by all staff hours to indicate the maximum number of students whom all staff (including non-endorsed others, students, and volunteers) might be able to serve during a single hour.

Contracted Computer Services

The amount spent by LMCs in the district for contracted computer services.

Books
Periodicals
Film/Video Rental
Other Materials
Total Materials Expenditures

The amounts spent by LMCs in the district for different categories of library materials and their total.

Materials Expenditures Per Student

This adjusted figure divides total materials expenditures by Fall 1985 enrollment to indicate the average amount·per student spent on library media materials.

Microcomputer Hardware
Other Library Equipt
Total Equipment Expenditures

The amount spent by LMCs in the district for different categories of library equipment and their total.

Equipment Expenditures Per Student

This adjusted figure divided total equipment expenditures by Fall 1985 enrollment to indicate the average amount per student spent on library media equipment.

Books--Added & Held 84-5

Book volumes added to LMC collections in the district during 1984-85 and the number of volumes held in those collections at the end of 1984-85. These figures are estimated to the nearest 10 additions and nearest 1,000 holdings.

Book Acquisition Rate

This adjusted figure indicates the percentage of a district's book collections which were acquired during 1984-85 by dividing books added by books held.

Books Per Student

This adjusted figure indicates the average number of books in a district's LMC collections for each student by dividing books held in 1984-85 by Fall 1985 enrollment.

Encyclopedia--Added & Held 84-5
Subscriptions--Added & Held 84-5

Encyclopedia and periodical and newspaper titles added during and held at the end of 1984-85.

AV Items--Added & Held 84-5

Films, kits, filmstrips, recordings, and videotapes added during and held at the end of 1984-85. These figures are estimated to the nearest 10.

AV Acquisition Rate

This adjusted figure indicates the percentage of a district's AV holdings which were acquired during 1984-85 by dividing AV items added by AV items held.

AV Items Per 25 Students

This adjusted figure indicates the average number of AV items in a district's AV collections for every 25 students by dividing AV items held by Fall 1985 enrollment and multiplying that figure by 25.

Software--Added & Held 84-5

Microcomputer software packages added during and held at the end of 1984-85.

Software Acquisition Rate

This adjusted figure indicates the percentage of a district's software holdings which were acquired during 1984-85 by dividing software added by software held.

Students Per Software Pkg

Students per microcomputer software package. This adjusted figure indicates the average number of students who must share access to each software package by dividing Fall 1985 enrollment by software held.

Other Items--Added & Held 84-5

Other library media materials (including microform items, flat pictures, charts, and games) added during and held at the end of 1984-85.

Film Projs--Added & Held 84-5
Students Per Film Projector
Slide/FS Projs--Added & Held 84-5
Students Per Slide/FS Projector
Audio Equip--Added & Held 84-5
Students Per Audio Equipment
Overhd/Opaq Projs--Added & Held 84-5
Students Per Overhd/Opaq Projector
Microcomputers--Added & Held 84-5
Students Per Microcomputer
Video Rec/Play--Added & Held 84-5
Students Per Video Rec/Play
TVs/Monitors--Added & Held 84-5
Students Per TV/Monitor
Other Equip--Added & Held 84-5

Film and slide/filmstrip projectors, record/tape players, overhead/opaque projectors, microcomputers, video recorders/players, tvs/monitors, and other AV equipment added during and held at the end of 1984-85.

Students per type of equipment figures indicate the average number of students who may or must share each piece of equipment.

LMC Visits Per Typical Week

Estimate of the total number of visits of students and other clientele per typical week (duplicated count).

Reference (Assistance) to Students
Reference (Assistance) to School Staff
Library Instruction (Provided to) Individuals
Library Instruction (Provided in) Sequential Program
Assist (Students & Staff in) Microcomputer Use
Circulate AV Equipt
Assist (Students & Staff in) Materials Production
Update Teachers (by Providing Information on) Educ/Media (Developments)
Support Classroom Activities (by Providing Media Resources)
Collaborate w/Teachers (to Provide Cooperative Programs)
Assist (with) Text(book)/Curr(iculum) Selection
Access Info(rmation) Outside Sch (including InterLibrary Loan)

For each of these services, 3 indicates a service on which staff spend the greatest amount of time, and 1, the least amount of time.

LMC-PL Cooperation

For this item, 4 indicates a district with a combined school/public library; 3, a LMC that is a branch of a public library; 2, informal service to the public; and 1, service to school clientele only.

Summer Reading Program

1 appears in this column for those districts in which any school offers a Summer Reading Program.
